from Britton (1980).  
A rather uncommon resident in woodland, bushed and wooded grassland and cultivated country from sea-level to 1700 m. Two races occur: nominate in N and E Uganda from West Nile to Karamoja, Teso and Elgon, and in N Kenya south to the Turkwell and N Uaso Nyiro rivers, Lake Baringo, the Horr valley and the lowlands of Meru and Embu; *granti* in Tanzania northwest to Ujiji, N Tabora and Serengeti, and border areas of SW Kenya from Mara GR to Amboseli. Sight records from Tsavo NP (East and West) probably belong with the nominate race while those from Ng'iya, Yala, Maseno and Kakamega in W Kenya are possibly referable to *granti*.

Widespread within both Miombo and Acacia woodlands but you have to be out after midnight to hear this bird.
