

Black Cuckoo Shrike

Campephaga flava

843 plots from 1,994 records

Virgin Yellow-vented Bulbul squares **9**

Single YvB month **16**

Two YvB months **24**

	Seasonality		
	presence	bs	eggs
January	197	9	1
February	166	8	1
March	167	3	1
April	90	2	1
May	95	1	2
June	169	1	-
July	200	2	1
August	179	-	-
September	188	2	-
October	154	5	-
November	165	-	-
December	174	6	2
month 13	2		

A locally common and widespread bird but known in all months from only 6 atlas squares which suggests considerable movements. Twice as many records for July as May also suggests movement.

As ever, the paucity of data in the SE and West simply reflects poor observer coverage
