from Britton (1980)
Wide-ranging up to 1800m in forest edges and glades, riparian forest strips and richer woodland, where it is seldom common. While probably mainly resident there is evidence of nocturnal movement at Mombasa. Three races occur *impavida* in interior S TZ from Songea and Njombe to Ufipa *cinereola* in the coastal lowlands north to Boni, inland to N Iringa, Kilosa, Kondoa, Mt Kilimanjaro, Taita and the eastern edge of the C KE highlands from Narossura to Nairobi and Embu *brevicaudata* in S and W Uganda from Budongo to the Impenetrable and Malabigambo forests, east to Jinja, and at Kakamega Forest in W Kenya.
